

Subject: Partnership enquiry — student health referral network

Hello,

I'm writing on behalf of Thames Valley University's student services office. We're looking to set up a referral partnership so our students (around 3,000 on the main campus) can access specialist care more easily — right now we just tell them to “find a GP” which isn't great.

We'd want this to be a proper referral network with one of your satellite clinics, ideally something that can be running by the start of next term — so in about 25 days if possible, around August 28th.

Could someone put together a proposal for us? We'll obviously need this to be fully compliant with UK GDPR given it involves student health data.

Best,

Dr. Helen Whitmore

Head of Student Services, Thames Valley University
